

# Project Management

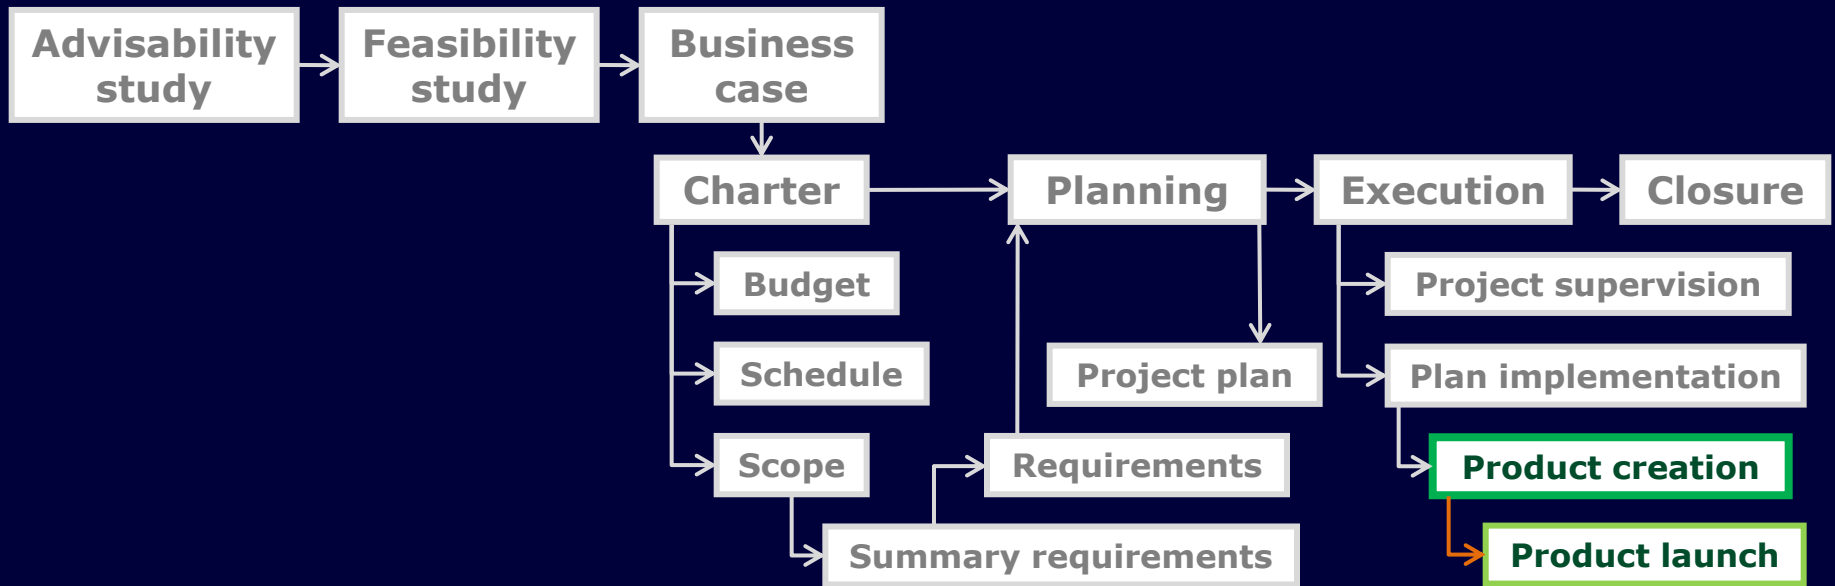

---

## Product life cycle

# Reminder: project life cycle

# A product is born...

...after gestating throughout the life of the project!

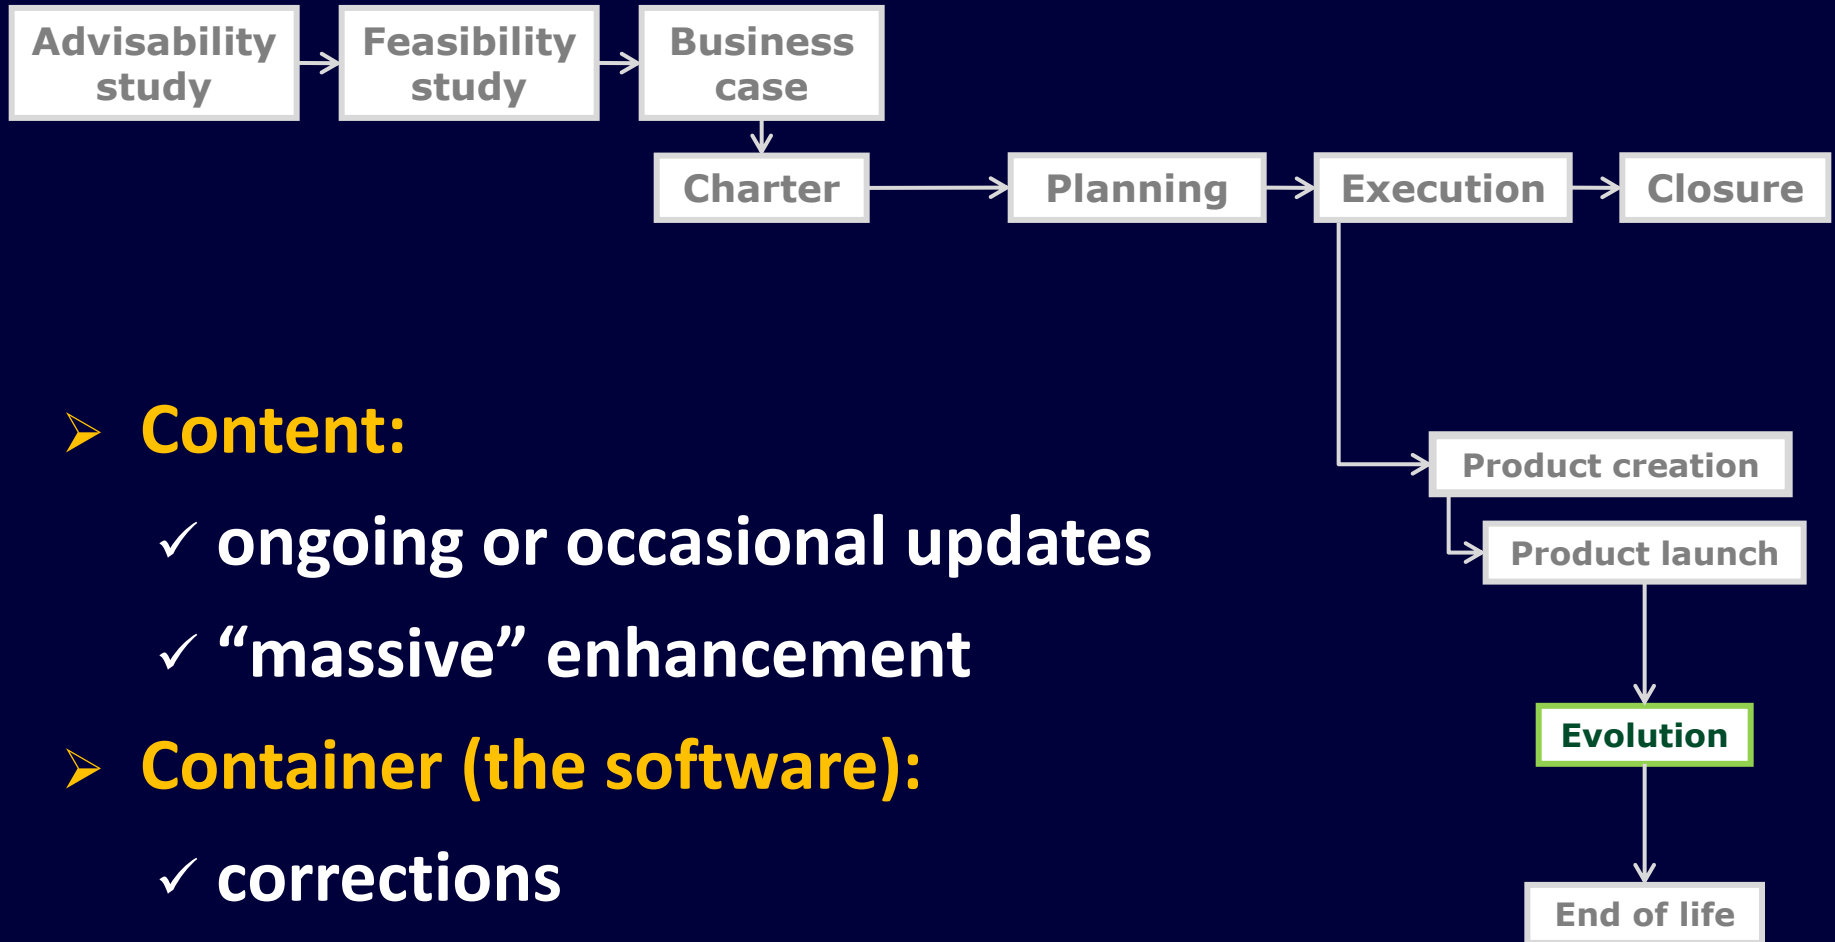

# Product life cycle

# Product launch

# Product evolution

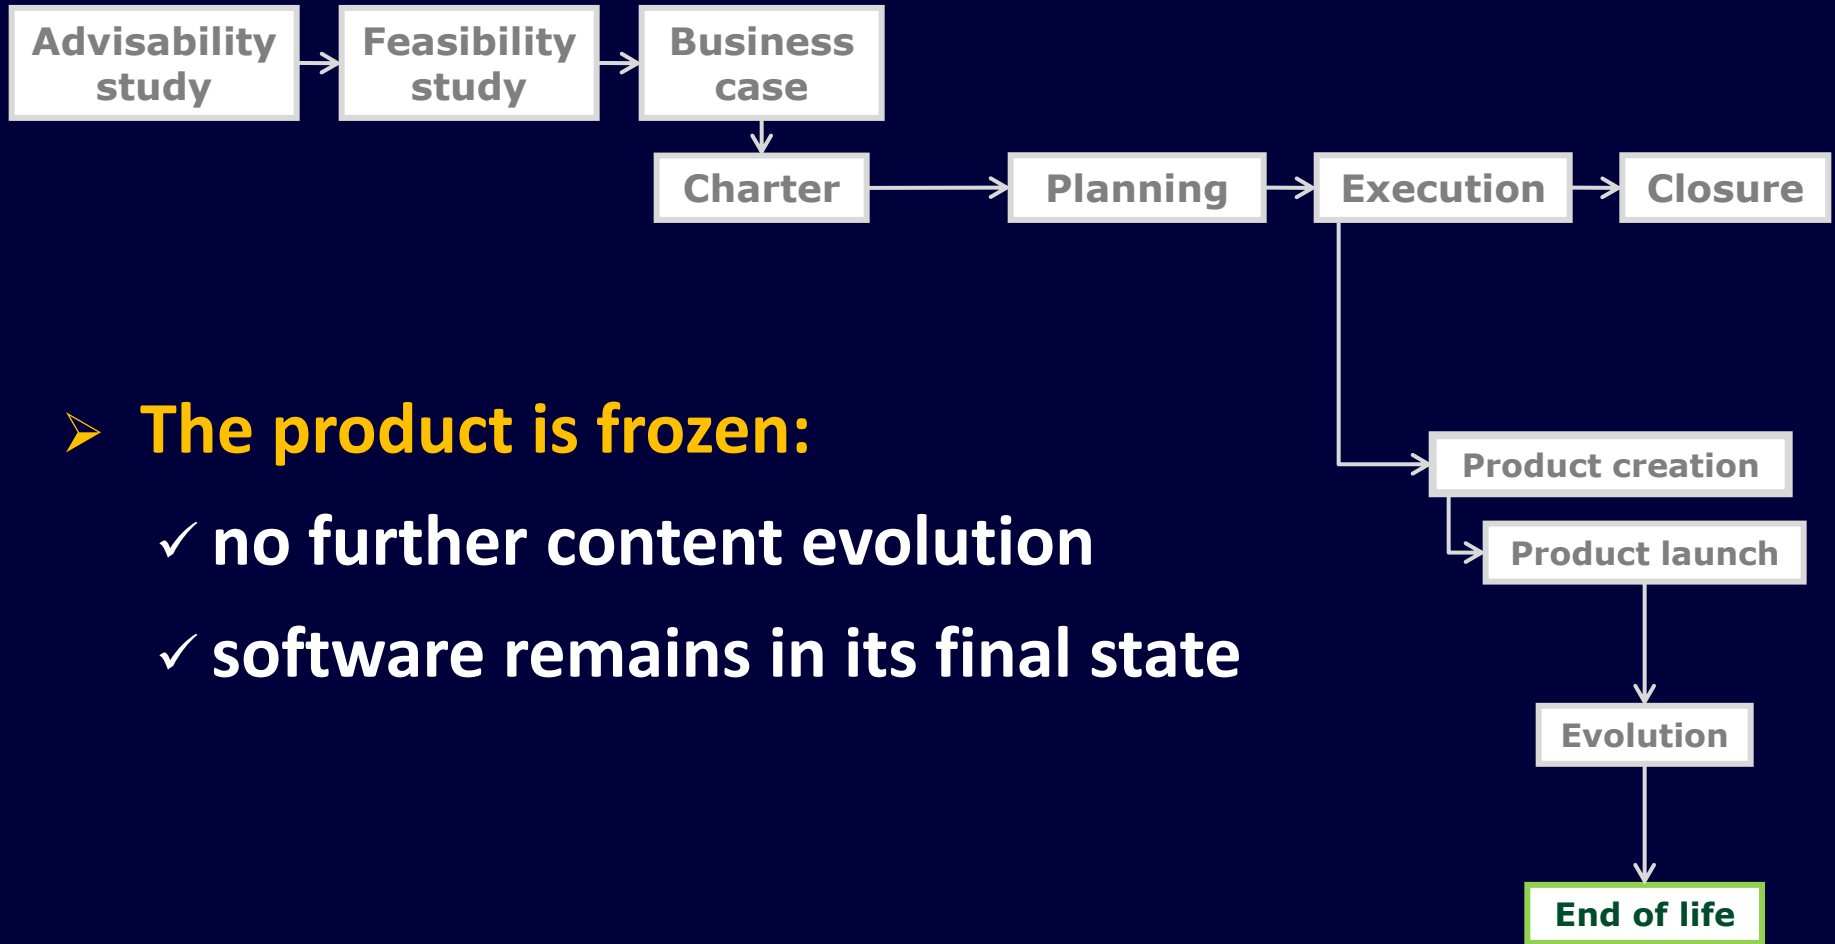

## ➤ Content:

- ✓ ongoing or occasional updates
- ✓ “massive” enhancement

## ➤ Container (the software):

- ✓ corrections
- ✓ updates
- ✓ revisions

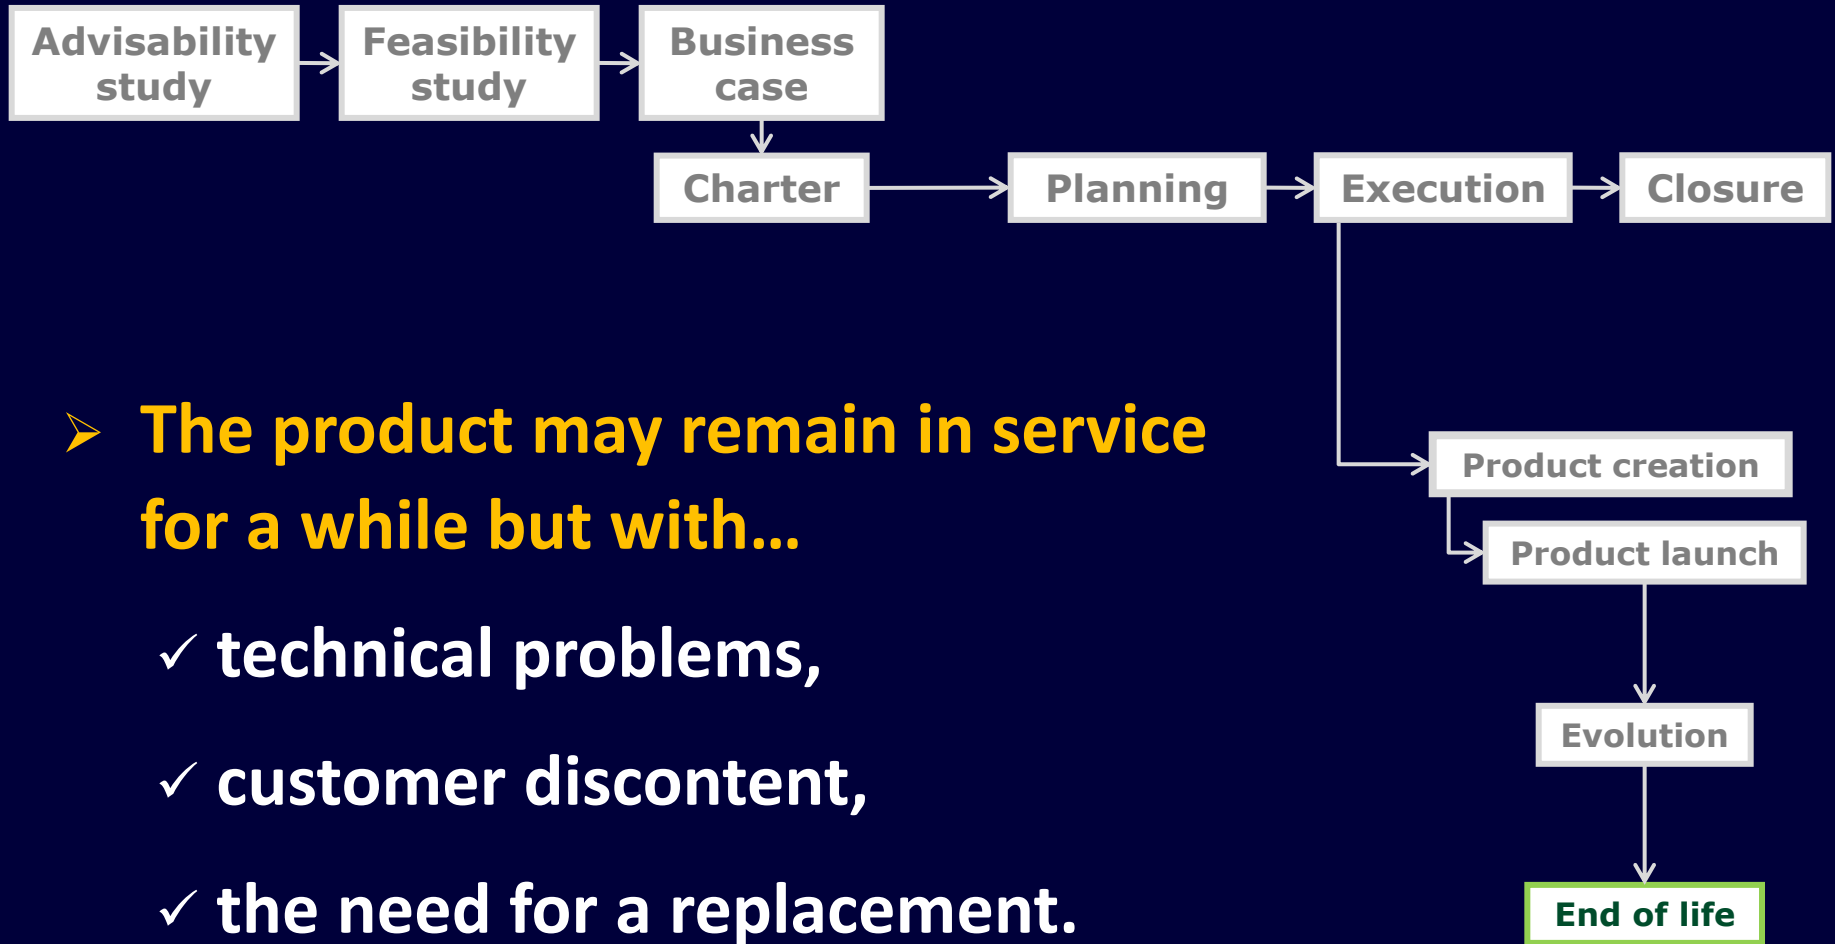

# End of life of the product (1)

## ➤ The product is frozen:

- ✓ no further content evolution
- ✓ software remains in its final state

# End of life of the product (2)

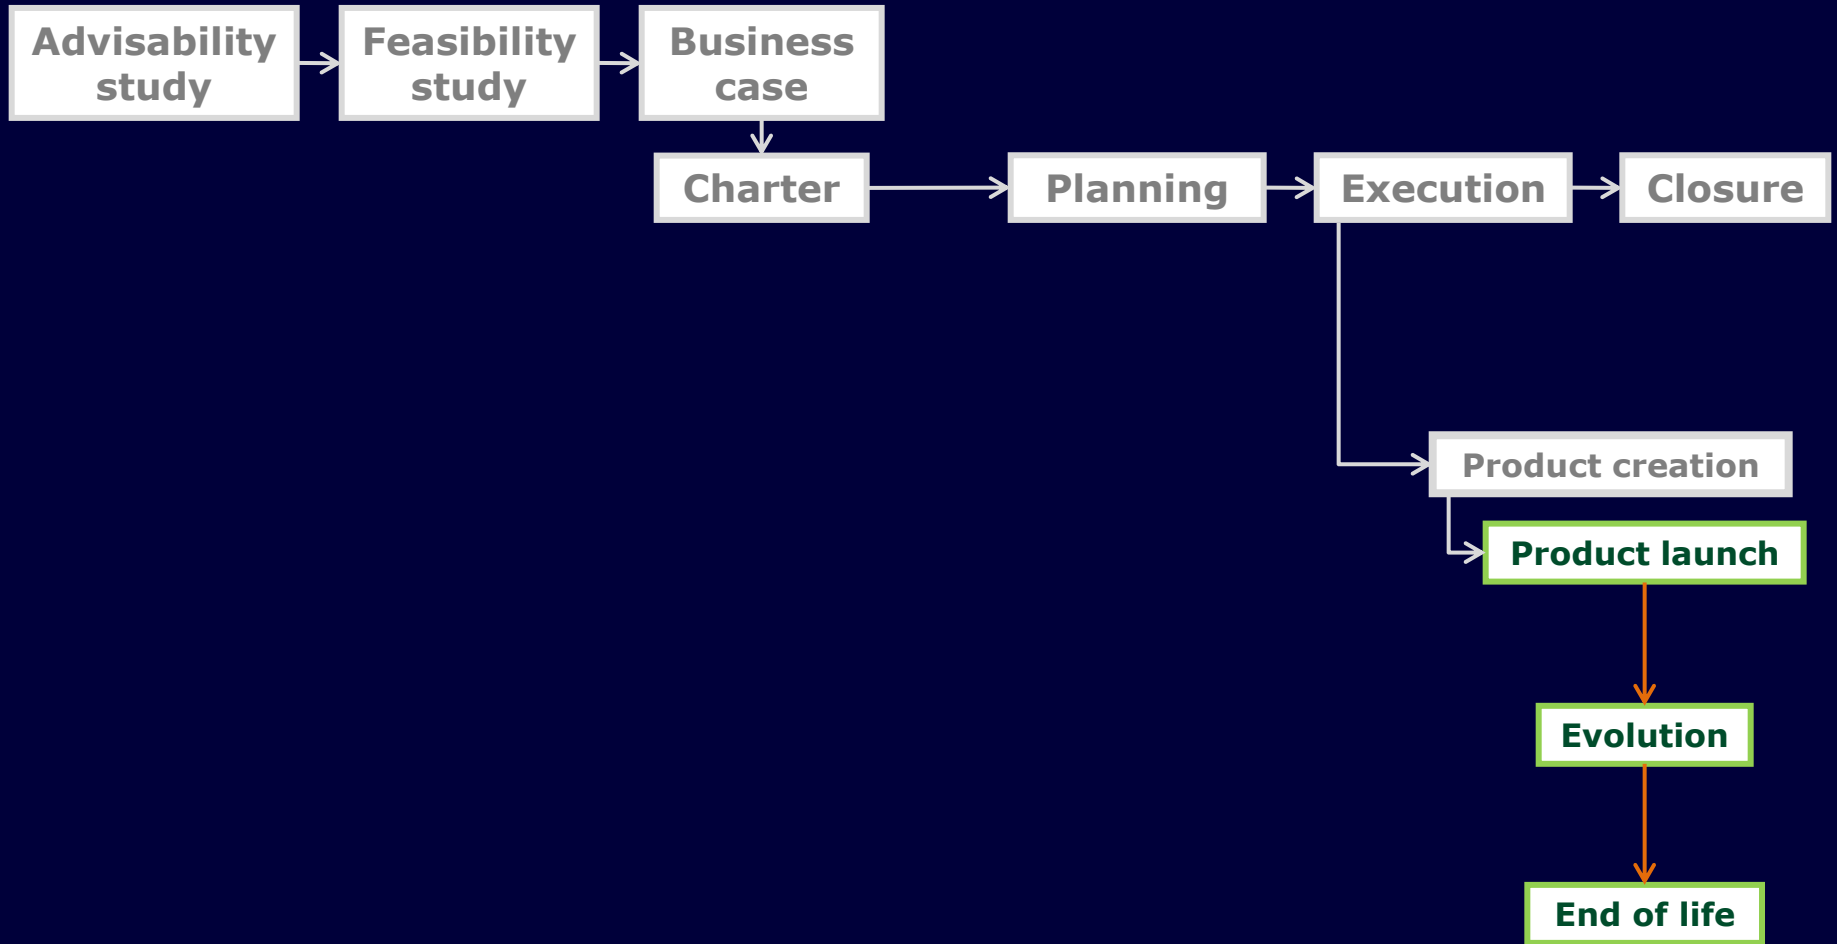

➤ **The product may remain in service for a while but with...**

- ✓ technical problems,
- ✓ customer discontent,
- ✓ the need for a replacement.

# Product life cycle

**Questions?**

# Factors influencing the life of a product

- Market and competition
- User needs/requirements
- Price
- Business model
- Target platforms / Technical environment

# Market and competition

- **Market evolution**
- **Competitors' products**
- **Product positioning (content, features, performance)**
- **Novelty and innovation**
- **Clear and simple sales arguments**
- **Distinctive features**

# User needs/requirements

- Evolution of needs
- User feedback
- Commercial partners (sales reps, distributors...)
- Customer Services

# Price and business model

- Market demand & supply
- Direct impact on product
- Sales channels
- How revenue is generated
